Index to Volume 33

Ahmad, S., and Newman, D. J.—
Finite ligand size and the Sternheimer antishielding factor γ_∞ 303
Amos, K.—
See Smith, R. 1
Amos, K., Nesci, P., and Morrison, I.—
A comparison of spectroscopic models of low excitation 2^+ states in ^{24}Mg and ^{28}Si from inelastic proton scattering 495
Anderson, F. S. B.—
See Silawatshananai, C. 1001
Arora, C. L.—
See Soni, K. R. 539

Astronomy and astrophysics
Accretion of planetesimals within gaseous ring 623
Flow dynamics in pulsar magnetosphere models with particle inertia 771
Fluxoid dynamics in relativistically streaming plasmas 611
Mode coupling in solar corona 121
Southern survey of galactic plane H_2O masers 139
Survey of OH masers at 1665 and 1667 MHz 639

Atmospheric and environmental physics
Numerical modelling of climate 897

Atomic and molecular physics
Angular correlations in electron–atom scattering 827
Drift velocity of electrons in CO_2 between 193 and 573 K 517
Drift velocity of electrons in mercury at 573 K 231
Drift velocity of low energy electrons in oxygen at 293 K 215
Electron diffusion coefficient in mercury at 470 K 989
Electron drift velocities in air 227
Electron transport in argon–hydrogen mixtures 975
Ion scattering spectrometry 843
Kinetic theory of charged particle swarms in neutral gases 343
Matrix elements of Boltzmann collision operator 449
Momentum transfer cross section for electrons in mercury vapour 251
Relation between polynomials orthogonal with respect to a class of gaussian weight functions 469
Relativistic effects in electron scattering by mercury 261
Temperature dependence of electron diffusion coefficient in CO_2 985
Two-accelerator facility for radiation damage studies in alkali halides 549

Baker, P. L., Ninio, F., Troup, G. J., and Bryant, R.—
Velocity measurement with speckle and speckle-like photography 601
Barker, F. C.—
Neutron and proton capture by ^{6}Li 159
The ^{7}Be(p, γ)^{8}B cross section at low energies 177
Barker, F. C., and Ferdous, Nasima—
The low-lying levels of ^{13}C and ^{13}N 691
Barton, W. A., and Cashion, J. D.—
Techniques and convergence properties of EFG lattice summations 1033
Batchelor, R. A., Caswell, J. L., Goss, W. M., Haynes, R. F., Knowles, S. H., and Wellington, K. J.—
Galactic plane H_2O masers: a southern survey 139
Baxter, A. M.—
See Fewell, M. P. 505
Bhatti, Sanaullah—
See Saleem, M. 209
Bickerstaff, R. P., and Wybourne, B. G.—
Colour–spin matrix elements for multiquark systems 951
Blair, D. G.—
Progress in the development of high sensitivity gravitational radiation antennas 923
Brennan, M. H.—
See Silawatshananai, C. 1001
Bryant, R.—
See Baker, P. L. 601
Burkitt, A. N.—
See Davies, B. 671
Burman, R. R.—
Flow dynamics in pulsar magnetosphere models with particle inertia 771
Fluxoid dynamics in relativistically streaming plasmas 611
Butler, N. R.—
See Duff, K. J. 73

Cashion, J. D.—
See Barton, W. A. 1033
Caswell, J. L.—
See Batchelor, R. A. 139

Caswell, J. L., Haynes, R. F., and Goss, W. M.—
Survey of OH masers at 1665 and 1667 MHz. I. Galactic longitudes 326° to 340° 639
Clark, P. D.—
See Eck, John S. 191
Clay, R. W., and Gerhardy, P. R.—
The distribution of time intervals between cosmic ray showers—a study of the randomness of cosmic ray arrival times 753
Clay, R. W., and Thornton, G. J.—
Zenith angle dependence of cosmic ray shower development from observations of the time structure of atmospheric Cerenkov pulses 607

Condensed matter

Anelasticity in glasses 573
Finite ligand size and Sternheimer antishielding factor 303
Heat flow at pressed contacts 745
Interface structure in simple cubic Ising system 1017
Magnetic order in spatially disordered systems 881
'Negative residual linewidth' in magnetically concentrated local moment systems 1049
Neutron diffraction—total powder pattern 565
Orbit–lattice interaction for lanthanide ions 733
Phonons, lattice instabilities and superconductivity 861
Photoacoustic measurements on semiconducting powder samples 91
Static lattice model of Hardy and Bullough applied to noble metals 561
Stress enhancement of G line of singly ionized zinc in germanium 73
Techniques and convergence properties of EFG lattice summations 1033

Cookson, P.—
See Smith, D. A. 573

Cosmic rays

Characteristics of interactions of 1·9 GeV n^{-1} iron nuclei with photographic emulsion 337
Cosmic rays in energy range 10^{14}–10^{17} eV 911
Distribution of time intervals between cosmic ray showers 753
Fluxes in the galactic centre 115
Zenith angle dependence of cosmic ray shower development 607

Crompton, R. W.—
See Haddad, G. N. 975
Hegerberg, R. 985, 989
Reid, Ivan D. 215

Davidson, W.—
Hyperbolic motion in gravitational theories 757
Davies, B., and Burkitt, A. N.—
On the relationship between quantum, random and semiclassical electrodynamics 671
Dube, Anil—
See Phalswal, D. R. 531
Duff, K. J., Fisher, P., and Butler, N. R.—
Stress enhancement of the *G* line of singly ionized zinc in germanium 73
Durance, G.—
See Silawatshananai, C. 1001

Eck, John S., Ophel, T. R., Weisser, D. C., and Clark, P. D.—
Application of the Frahn scaling formula to the analysis of the excitation of 1^- states in ^{40}Ca by ^{9}Be scattering 191

Electromagnetism and optics

Barrier theory based on half-barrier penetration 307
Shifts of coherent light beams on reflection at plane interfaces between isotropic media 319
Velocity measurement with speckle and speckle-like photography 601

Elford, M. T.—
The drift velocity of electrons in mercury vapour at 573 K 231
The momentum transfer cross section for electrons in mercury vapour from 0·1 to 5 eV 251
See also Hegerberg, R. 985
Elford, M. T., and Haddad, G. N.—
The drift velocity of electrons in carbon dioxide at temperatures between 193 and 573 K 517

Fazal-e-Aleem—
See Saleem, M. 209, 481
Ferdous, Nasima—
See Barker, F. C. 691
Fewell, M. P.—
See Spear, R. H. 509
Fewell, M. P., Spear, R. H., Zabel, T. H., and Baxter, A. M.—
Electric quadrupole excitation of the first excited state of ^{11}B 505
Fisher, P.—
See Duff, K. J. 73

Fluid dynamics and plasma physics
Effects of preionization level on 'stabilized' Z-pinch 1001
Interpretation of anomalous intensity ratios in laser-produced plasmas 283
Interpretation of blue satellite to resonance lines of helium-like ions of third sequence elements in laser-produced plasmas 25
Nonlinear double-diffusive convection in low Prandtl number fluid 59
Parametric instabilities in a magnetized and collisional plasma 531
Predictions from mean field equations of magnetoconvection 47
Quantum theory of energy loss by test ions to plasma 719
Ratio of sheath thickness to Debye length 39
Study of centre-fed antiphase circular antennas in warm plasma 539

Freeman, Geoffrey, and McKellar, Bruce H. J.—
Is nuclear physics the molecular physics of coloured quarks? 487

General relativity and gravitation
Hyperbolic motion in gravitational theories 757
Progress in high sensitivity gravitational radiation antennas 923
Spherically symmetric charged dust distribution in general relativity 765

George, E. P.—
See Hamada, T. 719
Gerhardy, P. R.—
See Clay, R. W. 753
Goldsmid, H. J., and Kaila, M. M.—
Heat flow at pressed contacts 745
Goss, W. M.—
See Batchelor, R. A. 139
Caswell, J. L. 639

Haddad, G. N.—
See Elford, M. T. 517
Haddad, G. N., and Crompton, R. W.—
Electron transport in argon–hydrogen mixtures 975
Hamada, T., Nakamura, Y., and George, E. P.—
Quantum theory of energy loss by test ions to plasma 719
Hamilton, John A.—
Ratio of sheath thickness to Debye length for a slightly ionized continuum plasma 39
Hay, H. J.—
See Newton, C. S. 549

Haynes, R. F.—
See Batchelor, R. A. 139
Caswell, J. L. 639
Heading, J.—
Barrier theory based on half-barrier penetration 307
Hegerberg, R., and Crompton, R. W.—
The diffusion coefficient for thermal electrons in mercury vapour at 470 K 989
Hegerberg, R., Elford, M. T., and Crompton, R. W.—
Temperature dependence of the diffusion coefficient for thermal electrons in carbon dioxide over the range 296–468 K 985
Hegerberg, R., and Reid, I. D.—
Electron drift velocities in air 227
Hicks, T. J.—
Magnetic order in spatially disordered systems 881
Hillas, A. M.—
Cosmic rays in the energy range 10^{14}–10^{17} eV 911
Ho-Ting-Hun, J., and Oitmaa, J.—
The Haus–Tanaka model for the ice VII–ice VIII phase transition 107
Hunt, B. G.—
Numerical modelling of climate 897

Irons, F. E.—
An interpretation of the blue satellite to resonance lines of helium-like ions of third sequence elements in laser-produced plasmas 25
An interpretation of anomalous intensity ratios within the hydrogen-like L_α doublet in optically thick laser-produced plasmas 283

Johnson, C. H. J.—
On the interface structure in a simple cubic Ising system 1017
Jones, A. B.—
D(d, n) ^{3}He differential cross sections from 18 to 26 MeV 203
Jones, I. R.—
See Silawatshananai, C. 1001

Kaila, M. M.—
See Goldsmid, H. J. 745
Kamran, Mujahid—
See Saleem, Mohammad 481
Kemper, K. W., and Ophel, T. R.—
The non-statistical population of the 11·10 MeV (4^+) state in ^{16}O by ^{12}C(^{6}Li, d) 197
Knowles, S. H.—
See Batchelor, R. A. 139

Kumar, Kailash—
Matrix elements of the Boltzmann collision operator in a basis determined by an anisotropic Maxwellian weight function including drift 449
Relation between polynomials orthogonal with respect to a class of gaussian weight functions 469
Kumar, Kailash, Skullerud, H. R., and Robson, R. E.—
Kinetic theory of charged particle swarms in neutral gases 343

McCusker, C. B. A.—
Some characteristics of the interactions of 1·9 GeV n^{-1} iron nuclei with photographic emulsion 337
MacDonald, R. J.—
Ion scattering spectrometry 843
McKellar, Bruce H. J.—
See Freeman, Geoffrey 487
Melrose, D. B.—
Mode coupling in the solar corona. VI. Direct conversion of Langmuir waves into o-mode waves 121
Miyase, H.—
See Pywell, R. E. 685
Mohr, C. B. O.—
Analysis of angular distributions of heavy-ion transfer reactions 965
Morrison, I.—
Nuclear systematics in the interacting boson (IBA) model 801
See also Amos, K. 495
Smith, R. 1
Murray, E. L.—
See Silawatshananai, C. 1001

Nakamura, Y.—
See Hamada, T. 719
Nayak, B. K.—
Spherically symmetric charged dust distribution in general relativity. I. General solution 765
Nesci, P.—
See Amos, K. 495
Newman, D. J.—
The orbit–lattice interaction for lanthanide ions. II. Strain and relaxation time predictions for cubic systems 733
See also Ahmad, S. 303
Newton, C. S., and Hay, H. J.—
A two-accelerator facility and its use for radiation damage studies in alkali halides 549
Ninio, F.—
See Baker, P. L. 601

Nuclear physics
Analysis of (p, 2p) reaction in asymmetric energy-sharing mode 1
Angular distributions of heavy-ion transfer reactions 965
$^{7}Be(p, \gamma)^{8}B$ cross section at low energies 177
Charged particle photoemission from ^{42}Ca 685
Comparison of spectroscopic models of 2^+ states in ^{24}Mg and ^{28}Si 495
$D(d, n)^{3}He$ differential cross sections from 18 to 26 MeV 203
Electric quadrupole excitation of first excited state of ^{11}B 505
Lost neutrinos of Sun 821
Low-lying levels of ^{13}C and ^{13}N 691
Molecular physics of coloured quarks 487
Neutron and proton capture by ^{6}Li 159
Non-statistical population of 11·10 MeV (4^+) state in ^{16}O 197
Static quadrupole moment of first excited state of ^{28}Si 509
Systematics in IBA model 801
Test of Frahn scaling formula 191

Ohashi, H.—
See Pywell, R. E. 685
Oitmaa, J.—
See Ho-Ting-Hun, J. 107
Ophel, T. R.—
See Eck, John S. 191
Kemper, K. W. 197

Particles and fields
Colour–spin matrix elements for multiquark systems 951
Dipole pomeron and pp elastic scattering at high energies 481
Enumeration of group invariant quartic polynomials in Higgs scalar fields 941
Pion charge exchange scattering at high energies 209
Relationship between quantum, random and semiclassical electrodynamics 671
Review of present particle physics theory 789

Peak, L. S.—
The lost neutrinos of the Sun 821
Phalswal, D. R., and Dube, Anil—
Parametric instabilities in a magnetized and collisional plasma 531
Prentice, A. J. R.—
Accretion of planetesimals within a gaseous ring 623

Pywell, R. E., Thompson, M. N., Shoda, K., Sugawara, M., Saito, T., Tsubota, H., Miyase, H., Uegaki, J., Tamae, T., Ohashi, H., and Urano, T.—
Charged particle photoemission from ^{42}Ca 685

Quinn, Helen R.—
What is happening in particle physics theory: a review talk for non-particle physicists 789

Rafique, M.—
See Saleem, M. 209
Reid, I. D.—
See Hegerberg, R. 227
Reid, Ivan D., and Crompton, Robert W.—
The drift velocity of low energy electrons in oxygen at 293 K 215
Riahi, N.—
Some predictions from the mean field equations of magnetoconvection 47
Nonlinear double-diffusive convection in a low Prandtl number fluid 59
Richardson, D. D.—
The static lattice model of Hardy and Bullough applied to the noble metals to calculate divacancy interaction energies and relaxations 561
Robson, R. E.—
See Kumar, Kailash 343

Sabine, T. M.—
Neutron diffraction—the total powder pattern 565
Saito, T.—
See Pywell, R. E. 685
Saleem, Mohammad, Fazal-e-Aleem and Kamran, Mujahid—
Dipole pomeron and proton–proton elastic scattering at high energies 481
Saleem, M., Rafique, M., Bhatti, Sanaullah, and Fazal-e-Aleem—
Pion charge exchange scattering at high energies 209
Shoda, K.—
See Pywell, R. E. 685
Silawatshananai, C., Anderson, F. S. B., Brennan, M. H., Durance, G., Jones, I. R., Murray, E. L., and Tendys, J.—
The effects of preionization level on a 'stabilized' Z-pinch 1001
Sin Fai Lam, L. T.—
Relativistic effects in electron scattering by atoms. I. Elastic scattering by mercury 261
Skullerud, H. R.—
See Kumar, Kailash 343
Smith, D. A.—
Definition of heat in open systems 95
Smith, D. A., and Cookson, P.—
Internal degrees of freedom and anelasticity in glasses 573
Smith, Harold, G.—
Phonons, lattice instabilities and superconductivity 861
Smith, R., Morrison, I., and Amos, K.—
Analysis of the (p, 2p) reaction in an asymmetric energy-sharing mode 1
Soni, K. R., and Arora, C. L.—
A study of centre-fed antiphase circular antennas in a warm plasma 539
Spear, R. H.—
See Fewell, M. P. 505
Spear, R. H., and Fewell, M. P.—
Static quadrupole moment of the first excited state of ^{28}Si 509
Stewart, A. M.—
Simple theory of the 'negative residual linewidth' in reflection spectroscopy of magnetically concentrated local moment systems 1049
Sugawara, M.—
See Pywell, R. E. 685

Tamae, T.—
See Pywell, R. E. 685
Tendys, J.—
See Silawatshananai, C. 1001
Thermodynamics and statistical mechanics
Definition of heat in open systems 95
Haus–Tanaka model for ice VII–ice VIII phase transition 107
Thompson, M. N.—
See Pywell, R. E. 685
Thornton, G. J.—
See Clay, R. W. 607
Troup, G. J.—
See Baker, P. L. 601
Tsubota, H.—
See Pywell, R. E. 685
Turner, R. G.—
Shifts of coherent light beams on reflection at plane interfaces between isotropic media 319

Uegaki, J.—
See Pywell, R. E. 685
Urano, T.—
See Pywell, R. E. 685

Weisser, D. C.—
See Eck, John S. 191
Wellington, K. J.—
See Batchelor, R. A. 139
Williams, James F.—
Angular correlations in electron–atom scattering 827
Wong, K. Y.—
Photoacoustic measurements on semiconducting powder samples 91
Wybourne, B. G.—
Enumeration of group invariant quartic polynomials in Higgs scalar fields 941
See also Bickerstaff, R. P. 951
Yoshimori, Masato—
Cosmic rays in the galactic centre 115
Zabel, T. H.—
See Fewell, M. P. 505
